

## **CHAIRS REPORT 8 JANUARY 2024**

During the recent bad storms, a resident in my area reported the pumping station had stopped working and was overflowing with foul water.

He had already contacted Anglian Water without success.

Mark Kiddle - Morris had already asked me to keep him up to date about this ongoing problem. I rang Mark and he chased up Anglian Water who arranged for a mechanic to fix the pump, after a tanker had been sent to empty it. A faulty warning system was the cause as no automatic tanker request had been sent. I advised the resident who thanked me and Mark for our intervention.

The Chair of Silver Threads club has asked me to give you her thanks for the kind donation towards the Christmas party which made a big difference.
